ASHMEN VICTORY

ON SATURDAY, OCTOBER 16, the Hospital Center House Staff met the "ASHmen" in a test of athletic skills and endurance on the Alton Park football field. After an impressive touchdown by Paul Evans, O.R., the residents, assisted by such notables as Drs. Harry Stephens, Jay Kloin, and Charles Scagliotti, could not seem to recover. Led by quarterbacks Bill Schaudé, Administration, and Joe Todaro, Radiology, an 18-0 victory came to the ASHmen after a second TD by Evans and a third by Pulmonary Function's Bill Hoffert.

The coveted "ASHtray" will be presented to the winning team and will be displayed in the cafeteria.

RADIOLOGIST FEATURED

DR. S. OSHER PAIS, RADIOLOGIST, was interviewed recently by Philadelphia's Channel 10 News and was featured on the 7 o'clock news. Dr. Pais was interviewed on the third anniversary of the Yom Kippur War when he and his wife, Joyce (a radiologist at Hahnemann Hospital) volunteered in Israel.

PASTORAL CARE

THE HOSPITAL CENTER WELCOMES Walter J. Repasky of the Diocese of Scranton and Dennis A. King of the Congregation of the Mission Order. Both men are in their third year at the Mary Immaculate Seminary in Northampton; they are completing the practical experience which is a part of their Apostolic training required for ordination.

Mr. Repasky and Mr. King will be in the Center Wednesday evenings and Friday afternoons until April. They are available for pastoral visitations by calling Father Connolly.

EQUIPMENT ADDITION

DR. FRANCIS KLECKNER, of the Gastroenterology Section of the Department of Medicine, recently donated an EdnaLite Projector Pointer for use in the Hospital Center Auditorium. The pointer will be available for conferences, classes, and symposia, and will provide a high intensity, arrow-shaped beam of light to aid in visual aid teaching. This is a great improvement over the pointer previously in use.

Delivery of the pointer has been delayed due to the United Parcel Service strike, but it is hoped that it will soon be available.

The Center's staff and students extend their greatest appreciation to Dr. Kleckner.

NEW ADDITION

THE DEPARTMENT OF ENGINEERING announced the addition of a bench in the outer vestibule of the main lobby. The bench was installed for those who must wait for rides or the LANTA bus.

## GOOD LUCK

THE HOSPITAL CENTER regretfully accepted the resignation of Rebecca Nevin, R.N., of the Cardiac Rehabilitation Unit. Mrs. Nevin has been with the Center since its opening in September, 1974; she will be leaving October 22.

## MEDICAL EXPLORERS

ON MONDAY, OCTOBER 18, 1976, the Medical Explorer Post 916 met in the Hospital Center Auditorium. After a short business meeting, the Explorers were introduced to Drs. Judy Hoffman, Stephen Olex, and Robert Oriel. The physicians spoke briefly on their experiences in medical school and as members of the House Staff, then opened the floor to questions from the Explorers. Thanks to their time, the Explorers now have a more realistic understanding of the requirements and duties of a doctor.

The Explorer Olympics in tennis were held last weekend. Post 916 took first place in both boys' and girls' tennis and second place in girls' competition. This Saturday, Olympic competition will be in volleyball, swimming, and field events, all taking place at Lehigh University.

## ASTHMA SEMINAR

THE LEHIGH VALLEY TUBERCULOSIS AND HEALTH ASSOCIATION will sponsor a seminar entitled "What's New in Bronchial Asthma" to be held at the Holiday Inn East on Saturday, November 13, 1976. Speakers at the conference will include Drs. John P. Galgon, Joseph E. Vincent, John A. Kibelstis, and Harold Kreithen, all members of the ASHHC staff. The conference has been approved for credit by PNA, AMA, AAFP, and AOA. For registration information, contact the Educational Development Office at Extension 2026.

## WOULD YOU BELIEVE.....

CLAIMS FOR HEALTH CARE BENEFITS are no laughing matter. However, anyone who deals with large numbers of claims and related correspondence will find ailments with uncommon spellings. High pertension, yellow jonders, very coarse veins and flea-bitis. In addition, surgery has been performed to remove plops, humrods, molds and a sis. One claimant, feeling like a devil, reported duodemon trouble. Other ailments included limp glands, schull fractor, soar throat, boyles, broken color bone, addnoise, and goalstones. To top it off, a claim recently was received for an annual Pabst smear.
